ModPlay in Logic Pro

Use a MIDI track
ModPlay is inserted as a MIDI FX plug-in.

**Insert ModPlay in the MIDI FX slot**

ModPlay is under Audio Units > FSK Audio

**Insert the target plug-in in the Instrument slot**

To send ModPlay to a hardware device, insert an "External Instrument".

To process audio, insert a "MIDI-controlled Effect".
To send audio to these plug-ins, select the desired track from the "Side Chain" selector.

To send ModPlay to another track, use the "Internal MIDI In" (Logic Pro 11)
