

ModPlay in Cubase

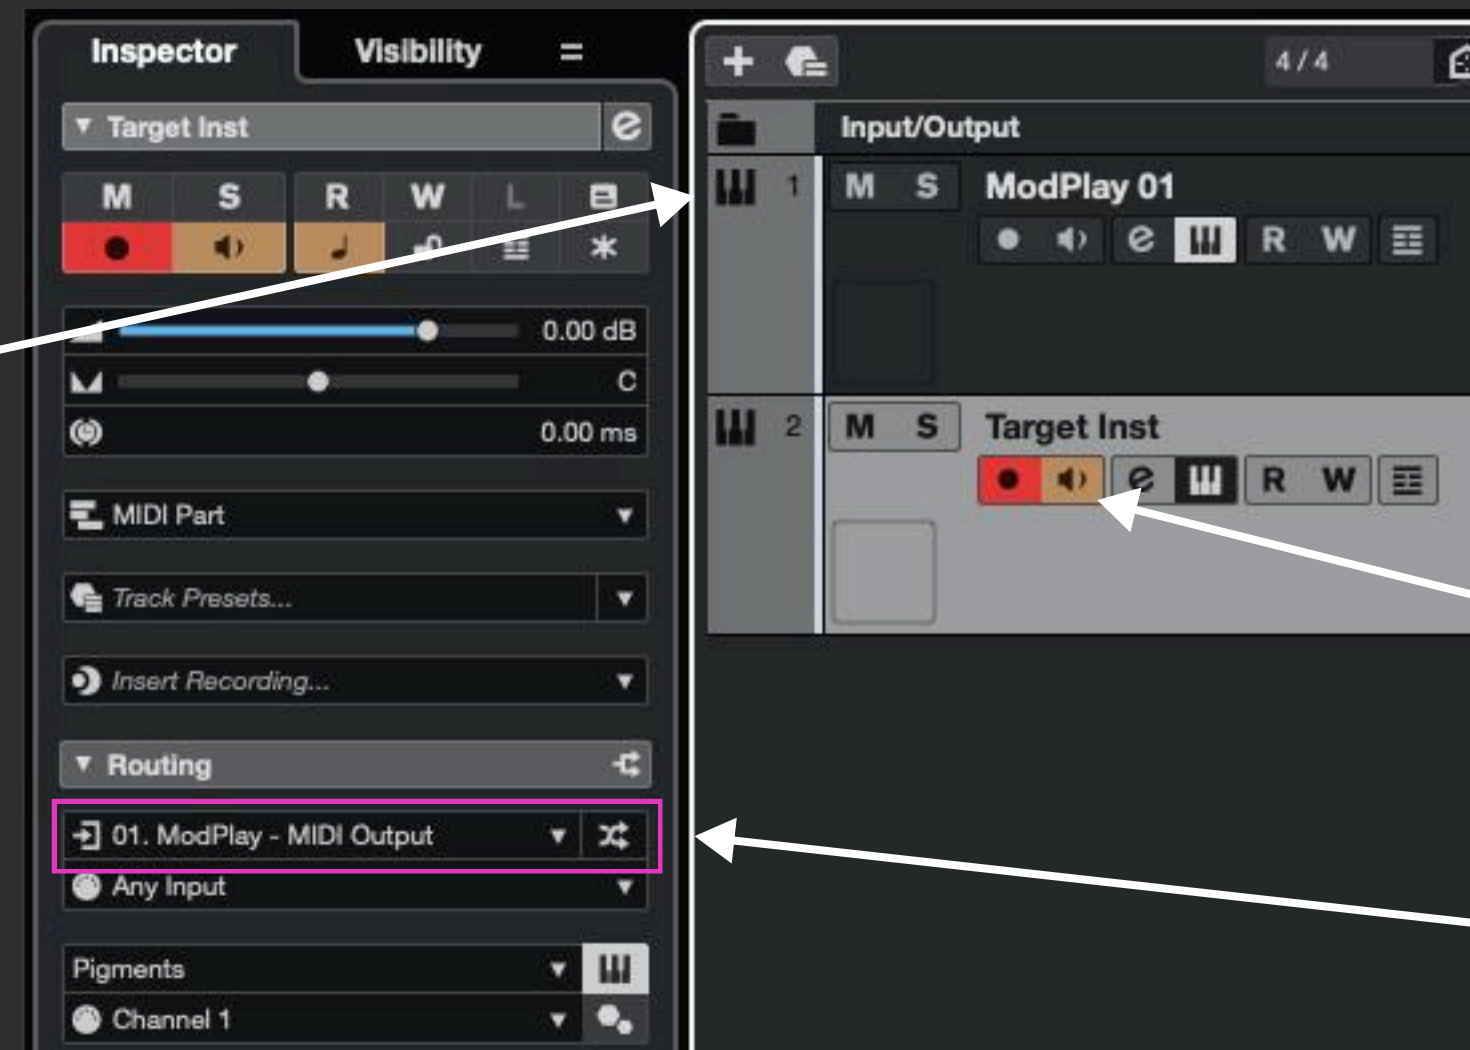

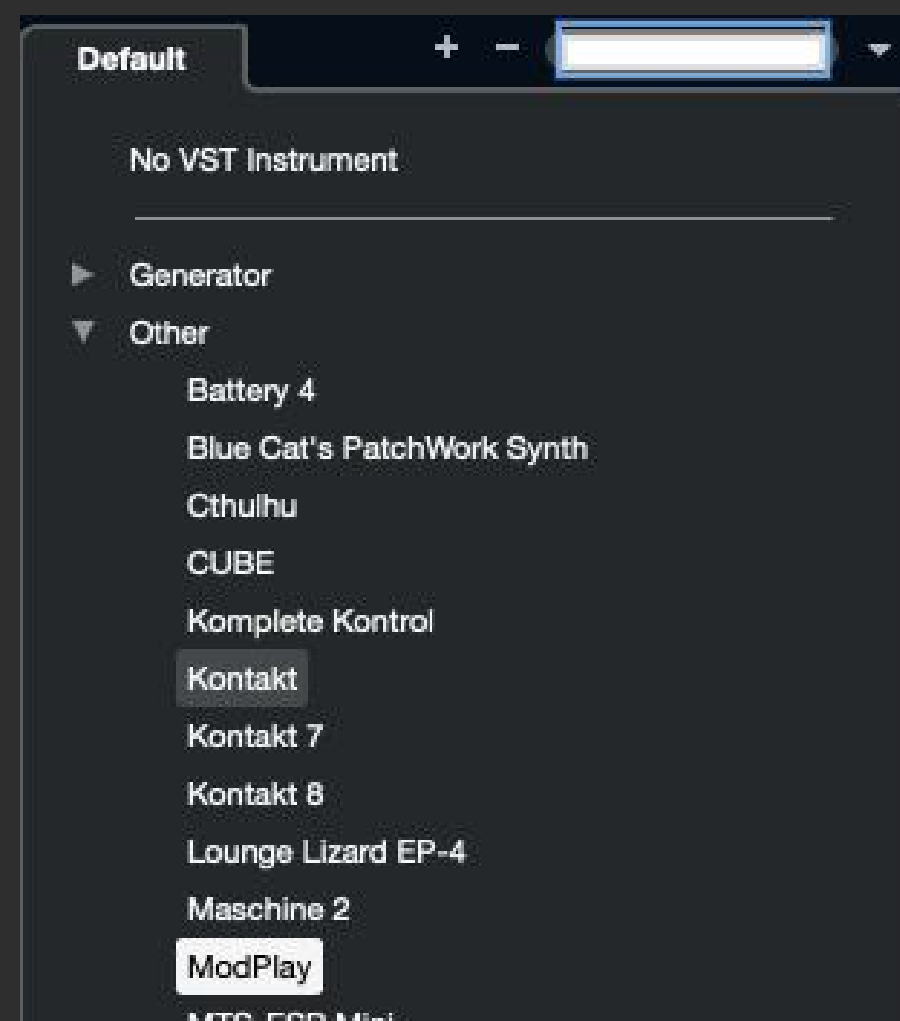

Use two Instrument tracks

One track will be for ModPlay, and the other for the target plug-in.

Instantiate a ModPlay

An Instrument track will be created.

ModPlay is under Instrument > Other

Instantiate a target plug-in
Another Instrument track will be created.

Enable Monitor

Select ModPlay as the Input on the target track

Sending ModPlay to a MIDI-controlled effect plug-in

Create a MIDI track to bridge the ModPlay track and the target plug-in.

On the MIDI track...
Select ModPlay as the input.

Select the target plug-in as the destination.

Enable Monitor
