

ModPlay in Studio One

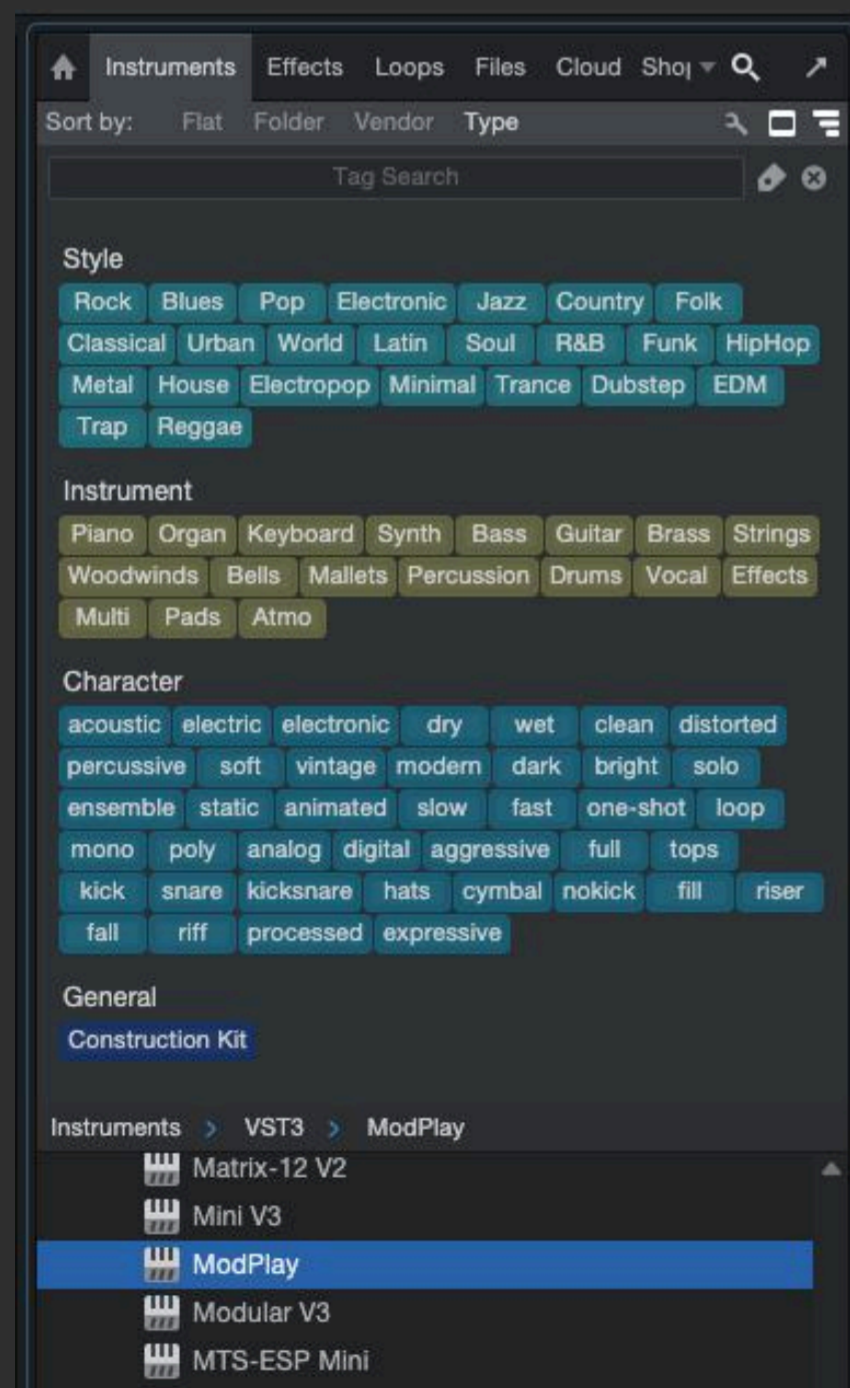

Use two Instrument tracks

One track will be for ModPlay, and the other for the target plug-in.

Instantiate a ModPlay

An Instrument track will be created.

ModPlay is under Instruments > VST3 (or FSK Audio)

Instantiate a target plug-in

Select ModPlay as a Direct Input for the target plug-in

Click the keyboard icon to open the Instrument Editor for the target plug-in, and select ModPlay from the Direct Input selector.

Sending ModPlay to a MIDI-controlled effect plug-in

Create an Instrument track for the target plug-in.

Audio track with the target plug-in.

Select the target plug-in

Select ModPlay
